AI Analysis Summary

You've done a great job using semantic elements like <nav> and <h1> to organize your content clearly! To take it further, consider using <main> instead of <article> for the main container and use <div> or <header> for grouping personal info to better reflect content meaning.

Priority recommendations:

1 Replace the <article> element with a <main> element to represent the main content area of the page.

2 Use a <header> or <div> instead of <section> for the 'personal-info' grouping since it is not a standalone thematic section.

3 Ensure that semantic elements reflect the content's role and meaning to improve document structure and assistive technology interpretation.

Issues   2

All (2)   Error (0)   Warning (2)   Info (0)

WARNING　　　**Structure & Semantics**　　　*AI Detected*　　　1 occurrence

Using an <article> element as the main container for a user profile which is not a standalone, independent piece of content. This causes confusion in content hierarchy and may mislead assistive technologies or search engines about the content's purpose.

```
<article class="container">
  <img src="assets/images/avatar-jessica.jpeg" alt="Portrait of Jessica Randall">

  <section class="personal-info">
    <h1>Jessica Randall</h1>
    <p>London, United Kingdom</p>
  </section>
```

LEARN HOW TO FIX THIS ISSUE

WARNING　　　**Structure & Semantics**　　　*AI Detected*　　　1 occurrence

The <section> element with class 'personal-info' contains a heading and location but lacks a clear thematic grouping or standalone meaning. This may reduce clarity in the document outline and affect how users and tools understand content relationships.

```
<section class="personal-info">
  <h1>Jessica Randall</h1>
  <p>London, United Kingdom</p>
</section>
```

AI-detected issues notice

Some issues shown above were detected by AI analysis and may require human review for accuracy. If you're unsure about any findings or need clarification, please reach out in the help channel on Discord for assistance.

Strengths　　3

Structure & Semantics

Uses semantic elements like <nav> with an appropriate aria-label and a list <ul> for social links, which clearly defines navigation purpose and groups related links.

Structure & Semantics

Includes a meaningful <h1> heading for the user's name, establishing a clear content hierarchy.

Structure & Semantics

Provides descriptive alt text for the profile image, improving content understanding when images are unavailable.
